Bachelor of Science in Mechanical Engineering Technology

- Kennesaw State University (Graduation: December 2020) Cum Laude
- Minor in Manufacturing Engineering with Concentration in Engineering Design & Graphics

Proficient with:

- Fusion 360, Inventor, Solidworks, Altium, Eagle, FEA and CFD analysis
- Microsoft Office, Visio, Quickbooks, Inkscape, Gimp, PreForm, Cura, HSMWorks

Work Experience:

Racing Communications Inc, **Lead Mechanical Engineer** (November 2018 – Current)

Mechanical Engineer Duties:

- Manage design and manufacturing of products used in NASCAR, IndyCar and Off-Road racing
- Responsible for start to finish product design and optimization
- Travel to race events to support customers and existing infrastructure
- Creation of engineering drawings for manufacturing and installation
- Selection and deployment of new 3D printing technologies
- Development of jigs to ensure predictable and reliable production
- Coordinate with fabricators to optimize components for assembly
- Focus on engineering and industrial design to create market leading products

Electrical Engineer Duties:

- PCB Layout and design for audio, power and antenna circuits
- Draft clear, production-ready schematics for use by the assembly team
- Purchasing and implementation of cable processing machinery
- Management of ordering complex PCB assemblies

Product Development Duties:

- Research and benchmark manufacturers to identify cost-saving opportunities
- Negotiate fair pricing, achieving favorable terms while maintaining positive relationships
- Generate and manage purchase orders for credit purchases
- Create test samples from multiple vendors at once, streamlining the product's development time
- Collaborate with the sales team to ensure alignment with market demands and sales objectives
- Complete detailed cost write-ups to accurately price new products
- Ensure vendors and manufacturers adhere to schedules, maintaining on-time project execution and supporting timely product launches

Leadership Duties:

- Teach and strengthen new engineers and interns
- Mediate interpersonal conflicts to ensure a positive work environment
- Assign short and long term projects with clear goals and deadlines
- Coordinate meetings to group problem solve various difficulties

Mitchell Metals, **SolidWorks Engineer** (April 2018 – November 2018)

- Created extensive canopy assemblies in SolidWorks
- Produced shop drawings for use in installation and PE certifications
- Developed practices to ensure uniform drawing creation
- Utilized PDM software to ensure product specifications were met
